Advertise on Craigslist

value="true" />

There are many ways to advertise for free on the internet. One way is to use [Craigslist](#). This one ad will generate me a couple of leads. If you place it out there in 5 cities changing the ad slightly each time you can easily generate 10 to 20 leads each time.

You can also find this article published on [Advertise on Craigslist](#), and on the tag pages [advertise on craigslist](#), [craigslist](#), [My World Plus](#).
