# How to Add Video to Your Website

<object classid="clsid:d27cdb6e-ae6d-11cf-96b8-444553540000" [\\_Jelly](#) width="425" height="344"  
codebase="http://download.macromedia.com/pub/shockwave/cabs/flash/swflash.cab#version=6,0,40,0">

Before I joined GVO I never once used video on my websites or blogs. Maybe I used someone else's but never mine. As you can see from this blog that video is a big part of it any more. Search engines like videos as well as visitors that visit your site.

But here in this video I want to show you how easy it is to use Easy Video Producer which is part of my [GVO](#) Titanium package. Now the quality is much better if I wasn't running it through Camstudio to record this for you.

If your not using video on your blogs and websites today your missing out.

You can also find this article published on [How to Add Video to Your Website](#), and on the tag pages [add video to your website](#), [easy video producer](#), [how to add video](#), [splash page with video](#).
