Viral Mail Profits Can Save You Time In Managing Your List Builders

/>

I have been using [Viral Mail Profits](#) to manage my 19 different list builders that I use on a daily basis. It tells me when I can send and also tracks how many clicks my ads are getting. This can be a great way to test certain ads and always be using the ones that provide you with the most clicks.

Here is a video I just did for my [One on One mentoring](#) students that will walk them through using [Viral Mail Profits](#) and sending a email ad out through [List Volta](#).

To see all my different list builders that I use visit my [Step 1 Getting Traffic](#) page

We hope you enjoy this video and its helpful to your internet marketing business.

Best Regards,
Scott Gordon
