# **Affiliate Toolbox a URL Tracking Tool in Traffic Leads 2 Income**

## Affiliate Toolbox a URL Tracking Tool in Traffic Leads 2 Income

[Affiliate Toolbox](#) is a new program that is in the downline builder in Traffic Leads 2 Income. I think *Affiliate Toolbox* is one of the mos best url tracking programs out on the internet today. Since it's integrated into [Traffic Leads 2 Income](#) you would be crazy if your not using it.

I am a free member myself in [Affiliate Toolbox](#) but will soon upgrade once I hit my limit of websites that I can track. Once I seen how powerful Affiliate toolbox was in telling me where y signups were coming from as well as how my advertising campaigns were working. Every morning I log into Affiliate Toolbox and reset all my url tracking so I can see clearly during that day how each one of my ad's are working.

Affiliate toolbox also allows you to tracking banners as well and set them up in a rotators. This is a great way to put your banners inside Traffic Exchanges. Once you get your urls sites set up in Affiliate Toolbox you only have to change the url inside there and it will then change it in all the other Traffic Exchanges.

I use many credit based safelist, I have found the best way to manage them is through [Viral Mail Profits](#).

## Watch the Video on how I use Affiliate Toolbox with Traffic Leads 2 Income

I hope this helps you understand how I use Affiliate Toolbox today with Traffic Leads 2 Income. It's extremely helpful tool in telling you where your signups are coming from.
