Let's go through the numbers so you understand how this lead generation can bring you success. Getting two leads a day into your auto responder is 60 leads a month. This will begin to convert in your 2nd and 3rd month. You will begin to convert into your business between 5 to 10 percent. So how does 3 to 6 people into your business every month sound to you?

The key to your lead generation is your lead capture page and your own auto responder. If you don't have one I will give you your own lead generation system for Free. Lead generation is all about building your list. Once your lead generation system begins to collect leads, you will then build the know, like and trust up with your leads and over time they will join things that you share with them. I learned this method back when I was with Leaders Club and I was buying leads every month from them. But I would market there system using this 2 a day method which was taught by Jeff Zalewski who was National Director of Training. I learned quickly from him, by taking daily action and driving the right kind of targeted traffic to your lead capture page you can get signups into any business. Lead generation worked back then and lead generation works great now. You just have to take daily action and your lead generation will provide you with success.
